

Bigbelly Smart

Built on Bigbelly's fundamentally better bin, the Smart is a 47-gallon (178 L) capacity, CLEAN™ connected bin—ideal for geographically spread-out deployments or where collections reduction is important. The Smart can be deployed standalone or in combination with any other Bigbelly bin type to form a multi-stream kiosk.

With its fully-enclosed Chute disposal interface, the Smart is uniquely equipped to keep waste contained and out of sight. The Smart has an inner bin capacity that is 1.7x greater than a traditional waste bin.

The Smart is equipped with sensors that monitor and report fullness level, collection activity, bin status, and GPS location. All information is communicated to Bigbelly's CLEAN™ Management Console and CLEAN™ Mobile, enabling streamlined and measurable waste management operations. The built-in LEDs on the front of the bin also indicate fullness status. The bin comes standard with a replaceable alkaline battery or, optionally, it can be solar-powered.
